

Adam Kimmins

Electrical Engineering Undergraduate

Columbus, Ohio | (740) 304-2571 | adam.kimmins23@gmail.com | [GitHub](#) | [LinkedIn](#)

EDUCATION

The Ohio State University, Newark, OH

Aug. 2026 - Present

B.S. in Electrical Engineering

Current Courses: Engineering Fundamentals (ENGR 1181), Engineering Math A (MATH 1172), Physics 1 (PHYSICS 1250)

Southern New Hampshire University, Manchester, NH

Jan. 2025 - Apr. 2026

Computer Science curriculum - 3.65 GPA

Courses: Calculus I, Discrete Mathematics, Applied Linear Algebra, Applied Statistics, Programming with C++

PROJECTS

IEEE / RoviSys PLC Ladder Logic Workshop

2026

IEEE at OSU | Ladder Logic, PLC I/O, HOA Control

- Attended a PLC workshop hosted by the IEEE student chapter and featuring engineers from RoviSys
- Read an electrical schematic to identify Hand-Off-Auto (HOA) switch inputs
- Wrote ladder logic to drive LED outputs matching real-time switch position

OSS HAL and Library for Heltec ESP32-S3 V4 Boards

2026

GitHub | C, C++, PlatformIO, ESP-IDF, Git

- Wrote a hardware abstraction layer and helper library for the Heltec ESP32-S3 V4 board line
- Added logic to auto-detect the board's RF front-end module and set the matching radio configuration at startup
- Used header-based conditional compilation so one codebase supports multiple board variants

Telemetry Processing & Ground Station Simulator

2026

GitHub | C++, WSL2, CMake, Qt Quick, Git, FSM design

- Built a finite state machine in C++ to manage state transitions for a simulated ground station
- Used POSIX pipes to separate data ingestion from UI rendering so timestamps stayed accurate
- Displayed processed telemetry data in a Qt Quick interface

WORK HISTORY

Math Tutor

Aug. 2026 - Present

The Ohio State University | Newark, OH

- Tutor students in Calculus, Algebra, Trigonometry, and Statistics
- Explain mathematical concepts and problem-solving methods through individualized instruction

Sales Associate - Part-Time

Mar. 2026 - Present

GNC | Pickerington, OH

- Assist customers with product selection and provide a positive shopping experience
- Perform data entry and collaborate with team members using Excel and Microsoft Teams

TECHNICAL SKILLS

- **Systems:** MatLab, Arduino, Git, Click
- **Tools:** Microsoft Teams, Excel, GitHub
- **Languages:** C++, C, Python

ORGANIZATIONS

IEEE Undergraduate Chapter at The Ohio State University Participant

Aug. 2026 - Present
